PROFILE SUMMARY

Highly adaptable Software Engineer with practical, production-level expertise in both **.NET (C#, ASP.NET Core) and Java (Spring Boot)** ecosystems. Proven ability to seamlessly transition between tech stacks to meet enterprise demands. Currently developing scalable backend REST APIs, Microservices, and SQL Server architectures for the **VFS Global Visa Processing Platform** at Mphasis, driving critical appointment management, slot configuration, and operational workflows.

EXPERIENCE

MPHASIS Nov 2025 – Present

Software Engineer *Mumbai, India*

Client: VFS Global — Visa Processing Platform

- Owned the **Agent Appointment module**, developing **6 core services comprising 40+ RESTful endpoints** using ASP.NET Core for appointment and center operations, including day open/close workflows, slot creation and configuration, agent document management, and sub-user management.
- Optimized appointment date-closing workflows by consolidating database operations, reducing database round trips from approximately **5 to 2 per date**, which drove down **P99 and P95 latencies by 33%** while handling slot closure, appointment cancellation, and applicant notifications.
- Implemented end-to-end **Re-biometrics workflows**, covering validation, country-specific approval, manager approval, eligible VSC selection, appointment booking, appointment-letter generation, and application status updates.
- Developed **notification and SLA reporting APIs** using ASP.NET Core and SQL, integrating with the VFS Global Notification Service for **SMS, email, and letter notifications** and implementing client-defined weekly and monthly calculations.
- Implemented **Track & Trace APIs** for application lifecycle data and **Device Management** workflows for VSC centers, including device groups, activation, playlists, status, and media mapping.
- Resolved static code analysis vulnerabilities identified via **Checkmarx**, ensuring strict enterprise security compliance and seamless CI/CD deployments across all developed services.

Biz2Credit (Biz2X) Sep 2025 – Nov 2025

DevOps Intern *Noida, India*

- Built a **DevOps dashboard** using React and Flask to provide visibility into infrastructure and operational activities.
- Automated **SSL/TLS certificate monitoring** using AWS ACM, Boto3, and AWS Lambda by retrieving certificate details, calculating expiry windows, and generating Jira alerts with increasing severity as certificate expiration approached.

MPHASIS Feb 2025 – May 2025

Trainee Software Engineer (Intern) *Mumbai, India*

- Built a full-stack **employee onboarding portal** using Spring Boot and Angular for internal onboarding workflows.
- Developed **notification and workflow dashboard modules** and integrated API-driven frontend and backend functionality.

PROJECTS

Cloud Share – Full Stack File Management System

React.js, Spring Boot, MongoDB, Spring Security, Clerk, Razorpay

- Built a full-stack file management platform using **React.js** and **Spring Boot** with file upload, download, and public/private access controls.
- Implemented backend authorization using **Spring Security** and **Clerk**, enforcing user-level isolation for private directories and integrated **Razorpay** for subscription payments and transaction logging.

QuizEasy – Full Stack Quiz Application

Next.js, Google Gemini API

- Built a full-stack quiz platform using **Next.js** with backend APIs for quiz and user data and integrated the **Google Gemini API** for dynamic, topic-specific question generation.
- Implemented analytics for **score breakdowns, accuracy, and time taken** to track quiz performance.

TECHNICAL SKILLS

Languages	C#, Java, SQL, C++
Backend & Databases	.NET 10, ASP.NET Core, Spring Boot, Web API, REST APIs, Microservices, Entity Framework Core, LINQ, SQL Server, MongoDB
Cloud & Tools	Microsoft Azure, Azure DevOps, AWS, Docker, Git, Postman, xUnit, Moq

ACHIEVEMENTS

- **Placement Representative, NITJ:** Secured **10+ companies** for campus recruitment.
- **GATE 2025:** Qualified the national-level examination for Computer Science.
- Solved **750+ Data Structures and Algorithms problems** across competitive programming and coding platforms.

EDUCATION

Dr. B.R. Ambedkar National Institute of Technology, Jalandhar Sep 2021 – July 2025

Bachelor of Technology in Information Technology *Jalandhar, Punjab*
